PROFESSIONAL SUMMARY

Software Developer with 4+ years of experience in full-stack web development, specializing in React.js, JavaScript, Python, REST APIs, WebSockets, and responsive web applications. Experienced in building applications from scratch across frontend and backend, including survey platforms, AI-powered survey creation, customer support chatbots, real-time communication, video calling/interview services, admin dashboards, and audience generation systems. Strong experience in frontend architecture, state management, API integration, backend business logic, real-time socket communication, AI-driven features, and data-driven audience segmentation.

TECHNICAL SKILLS

Languages: JavaScript, Python, HTML5, CSS3, SQL (Basic)
Frontend: React.js, Redux, Context API, Responsive Web Design, Tailwind CSS, Bootstrap
Backend: Python, Django ORM, Flask, REST APIs, API Integration
Real-Time: WebSockets, Socket-Based Communication, Real-Time Applications, Video Calling
AI: LLM Agents, AI-Powered Applications, AI-Based Survey Generation
Database: MySQL (Basic), Database Integration, Audience/Attribute Data
Tools: Git, GitHub, GitHub Copilot, Figma, Lovable, Linux, Windows

PROFESSIONAL EXPERIENCE

Smytten **December 2023 – Present**

Software Engineer

- Develop and maintain full-stack web applications across frontend and backend, working with React.js, JavaScript, Python, REST APIs, Django ORM, Flask, and modern web technologies.
- Build responsive websites and user-friendly interfaces from scratch for surveys, advertisements, admin dashboards, survey creation, survey-taking, and research platforms.
- Develop complex frontend logic, state management, conditional flows, API integrations, and reusable UI components for business-critical applications.
- Build AI-powered survey creation features using LLM Agents, enabling users to define survey goals and generate structured questionnaires and relevant audience suggestions.
- Develop customer support chatbot functionality with WebSockets and REST APIs, enabling bot-assisted support, real-time live-agent handoff, and ticket creation when agents are unavailable.
- Work on real-time communication features using WebSockets and socket-based architecture for live application updates and interactive user experiences.
- Contribute to video calling and interview services, including real-time communication and session-based functionality.
- Develop backend APIs and business logic using Python, Django ORM, and Flask, integrating backend services with React-based frontend applications.
- Build audience generation and segmentation functionality based on user attributes, survey responses, user behavior, and tags to support targeted audience creation.
- Work on Audience Persona 360, including AI-assisted attribute extraction from survey responses, attribute aggregation, and automated updates to audience data.
- Contribute to application performance, SEO, responsive design, debugging, testing, and production improvements across multiple products.

MountBlue Technologies **October 2022 – November 2023**

Software Developer / Frontend Developer – Deputation to Smytten

- Worked on Smytten web applications as part of a deputation assignment, contributing to frontend development and product feature implementation.
- Developed responsive interfaces using React.js, JavaScript, HTML, CSS, Redux, REST APIs, and related frontend technologies.
- Worked on survey, B2B, customer support, and research-oriented applications with a focus on usability and responsive design.

SELECTED PROJECTS

Survey Creator *React.js, JavaScript, HTML, CSS, REST API*

- Built the frontend application from scratch for creating surveys with sectional questionnaire segregation, question insertion, question reordering, media support, skip flows, and conditional logic.

- Implemented frontend rendering of conditional logic using simple expressions and AND/OR combinations of multiple expressions.
- Developed a dynamic Survey Consumer application integrated into the Smytten Android application through WebView.

Customer Support Agent Chat *React.js, JavaScript, WebSockets, REST API*

- Built a real-time customer support chat system where users interact with a chatbot first and can be connected to a live support agent when required.
- Implemented real-time communication using WebSockets and fallback ticket creation when no support agent is available.

AI-Based Survey Creator *React.js, JavaScript, LLM Agents, REST API*

- Developed an AI-powered survey creation workflow where users provide a survey objective and interact with AI-generated questions to create a complete questionnaire.
- Integrated AI-generated audience suggestions to support survey planning and audience targeting.

Audience Persona 360 *Python, Django ORM, Flask, React.js, AI Agents*

- Built an internal audience persona platform that generates audience segments using user attributes, survey responses, user actions, and tags.
- Implemented AI-assisted extraction of attributes from survey responses and automated Python-based updates to master attribute values.
- Enabled audience targeting based on user behavior and attributes for marketing and research use cases.

Video Calling / Interview Service *React.js, WebSockets, Real-Time Communication*

- Worked on video calling and interview workflows involving real-time communication, session handling, and interactive user experiences.

EDUCATION

Vasireddy Venkatadri Institute of Technology (VVIT), Guntur **June 2015 – May 2019**
B.Tech – Mechanical Engineering Grade: 65%
